DK

Norwegian Board of Technology (NBT),  
NO

## Invitation to participate and open call for papers

Dear Colleagues,

the concluding conference of the PRISE project will take place

on the 28<sup>th</sup> and 29<sup>th</sup> of April 2008  
in Vienna.

A main result of the PRISE project is a set of criteria for privacy enhancing security research and technology development for the Security theme within the Seventh Framework Programme (FP7) of the European Union. Whereas these criteria can provide important guidance towards security technologies and measures respecting human rights and personal privacy, they are obviously only a first step.

The purpose of the PRISE conference is to discuss in an open and broad forum this first step and the next steps required for a balanced approach on privacy and security. The programme is targeted at a broad range of experts on privacy and security issues, representing security industries, policy-making, research, human rights organisations as well as users of security technologies. The aim is to advance public debate and policy discourse and thus to contribute to security policies in line with human rights and privacy protection.

The PRISE team would like to invite you to contribute with your own presentation to this conference. Please consult the attached call for papers or our homepage <http://www.prise.oeaw.ac.at/conference.htm> for further details. Participants from the security industry are invited to present their privacy enhancing security technologies in an exhibition during the conference.

We are looking forward to seeing you in Vienna and to learn from your views on how to balance privacy and security.

Yours sincerely,

Johann Čas  
PRISE Project Coordinator  
Institute of Technology Assessment of the Austrian Academy of Sciences (ITA)  
Strohgasse 45/5  
A-1030 Vienna
